Professional Profile

Result oriented, problem solver and resourceful software engineer with 2 years of experience in programming, managing and leading software development teams. I have worked on numerous projects and products from concept to completion. And my specialty is to take product's development from scratch to on field deployment.

Specialties & Skills:

- **Frontend Web (React Js, Next Js)**
- **Backend Web (Node js , Express Js, Flask)**
- **Database (Mongodb, Redis, MySql)**
- **Version Control (git, github)**

Core Skills and Abilities

- Skilled in developing user-friendly applications with clean code using React.js, Next.js, and Node.js.
- Proficient in optimizing and debugging applications for performance.
- Experienced in both independent and collaborative team environments, delivering effective solutions to clients.
- Strong communication skills, both verbal and written, including online and on field client support.
- Developed RESTful APIs in Node.js and proficient with version control systems like GIT
- Experienced with Material Design for enhancing web app usability
- Proficient in databases including MongoDB, Redis, and MySQL
- Experienced in parsing various data formats (XML, JSON, etc.) to support application functionality

January 2024 - Present

- Responsible for developing and maintaining full stack web applications using technologies such as React.js, Node.js, and MongoDB.
- Collaborating with cross-functional teams to design and implement responsive and scalable solutions.
- Contributing to all phases of the software development lifecycle, from requirements gathering to deployment and maintenance.
- Implementing RESTful APIs and integrating with various databases to optimize performance and user experience.
- Feel free to customize this description further to highlight specific projects or achievements during your time at UMT.

Codegenix

Full Stack Developer

Remote Work

September 2023 - Present

- Developed and maintained web applications using technologies such as React.js, Node.js, and Express.js.
- Collaborated remotely with a team to deliver responsive and user-friendly solutions.
- Implemented RESTful APIs and integrated third-party services for enhanced functionality.
- Utilized version control systems like Git to manage codebase efficiently.

Smart SEO

Wordpress, Laravel, PHP Developer

October 2022 - January 2023

- Designed and developed WordPress websites, implementing custom themes and plugins to meet client specifications.
- Contributed to Laravel and PHP projects, focusing on backend development and database management.
- Participated in requirements gathering, testing, and deployment phases of web development projects.

Projects

Live Projects:

Xapitx

Developed a comprehensive e-commerce platform using React.js and Node.js, integrating payment gateways and user authentication.

Power Mart

Collaborated on a team to enhance a retail management system using Laravel and MySQL, implementing features for inventory management and reporting.

Livex

Designed and developed a live streaming application using React Native for mobile platforms, integrating real-time chat and video capabilities.

Practice Projects:

Chat-App

Created a real-time chat application using Socket.io and React.js, allowing users to communicate in group chats and private messages.

Blogger

Implemented a blogging platform with CRUD functionality using Express.js and MongoDB, enabling users to create, edit, and delete blog posts.
